GitHub: <https://github.com/kaelwebdev>

Cell phone: +573218482197

Email: kaelwebdev@gmail.com

Year of birth: 1995

City: Cali

Country: Colombia

What can I do now?

- Create and maintain interfaces for web applications.
- Work with designers, frontend and backend developers.
- Participate in all phases of development.
- Implement best practices in code and project management.
- Optimize performance and user experience.
- Review code quality.
- Contribute to technical documentation.
- Update code with technological trends if appropriate.
- API development, database design, componentization, testing, and software architecture.
- Analyze requirements.

Role:

Frontend

Preparation

Work experience: 2.5 years. Teamwork: 5.5 years. University education: 4.5 years.

Specialization: 2 years.

Area of greatest knowledge:

I have used around 30 different software development technologies, but I really focus more on technology related to web development:

Javascript: 5 years, Typescript: 5 years, React: 3 years, Angular: 2.5 years, Node, Firebase, MongoDB, Mysql, Docker, etc.
