Carlos Daniel Cortez

I have been working in the field of programming and development since 2014. I am a **Multimedia Engineer** and a **Software Engineer** specializing in **web application development**. I solve problems using software as a tool. I enjoy optimizing business processes, conducting research, and organizing.

Github: <https://github.com/kaelwebdev>

Cell Phone: +573218482197 (Better to message me on WhatsApp)

Email: kaelwebdev@gmail.com

Year of birth: 1995

City: Cali

Country: Colombia

Languages: Spanish, English.

What can I do right now?

- Making decisions and proposing technical and non-technical solutions.
- Participating in all phases of development (analyzing requirements, planning architecture and design, development, testing, deployment, and optimization).
- Communicating effectively with designers, front-end and back-end developers, and non-technical staff.
- Keeping an eye on the implementation of new technologies to improve both the development workflow and the final product.

Roles:

Frontend (primary), backend, full-stack

Education and Experience

Work experience: 2.5 years. Team development: 5.5 years. University education: 4.5 years. Graduate of San Buenaventura University in Cali. Specialization: 2 years.

Area of greatest expertise:

I have worked with around 30 different software development technologies, but I primarily focus on technologies related to web development:

JavaScript: 5 years, TypeScript: 5 years, React: 3 years, Angular: 2.5 years, Node.js, Firebase, MongoDB, MySQL, Docker, Git, AI agents, etc.

Key Qualities:

Stoic, organized, thoughtful, honest, introspective, analytical.
